INDEX OF SUBJECTS AND AUTHORS OF PAPERS

VOLUME XXIII

TRANSACTIONS OF AMERICAN SOCIETY FOR METALS

January, 1935—December, 1935

A

Aging at Room Temperature of 0.8 Per Cent Carbon Steel; Prolonged Tempering at 100 Degrees Cent. and— <i>G. A. Ellinger and R. L. Sanford</i>	495
Aging; Effect of High Hydrostatic Pressures on— <i>Leland Russell van Wert</i>	633
Aging of Steel— <i>E. S. Davenport and E. C. Bain</i>	1047
Alloy; New Heat Resistant— <i>S. L. Hoyt and M. A. Scheil</i>	1022
Alloy Steels; Properties of Some Cast— <i>T. N. Armstrong</i>	286
Alloys of Iron and Chromium— <i>V. N. Krivobok</i>	1
Alloys of Iron and Manganese—Part XIII— <i>F. M. Walters, Jr., and Cyril Wells</i>	727
Alloys of Iron, Manganese and Carbon—Part XIV— <i>Cyril Wells and F. M. Walters, Jr.</i>	751
Aluminum Additions in Modern Commercial Steels; Importance of— <i>H. W. McQuaid</i>	797
Annealed Low Carbon Steel; Directional Properties in Rolled and— <i>Arthur Phillips and H. H. Dunkle</i>	398
Arc Deposited Weld Metal; Studies on the Metallurgy of— <i>S. L. Hoyt</i> ..	61
Atmospheres Including Gaseous Carburizing; Heat Treatment in Controlled— <i>C. R. Austin</i>	157
Atmospheric Temperatures; Impact Resistance of Certain Nickel Steels at Low— <i>D. A. Campbell</i>	761
Austenite and Its Decomposition Range in a Quenched Cobalt High Speed Steel; Retained— <i>C. A. Liedholm</i>	672
Austenitic Steels at Elevated Temperatures; Ductility of Chromium-Nickel— <i>H. D. Newell</i>	225

C

Calculating Heat Loss Through Furnace Walls; Graphical Method of— <i>Clarence E. Weinland</i>	431
Carbon; Alloys of Iron, Manganese and—Part XIV— <i>Cyril Wells and F. M. Walters, Jr.</i>	751
Carbon Content on High Temperature Properties of Steels; Influence of— <i>A. E. White, C. L. Clark and R. L. Wilson</i>	995
Carbon High Chromium Tool Steels; Practical Observations of Some High— <i>W. H. Wills</i>	469
Carbon, Oxygen and Grain-Size; Magnetic Properties of Iron as Affected by— <i>T. D. Yensen and N. A. Ziegler</i>	556
Carbon Steel; Directional Properties in Rolled and Annealed Low— <i>Arthur Phillips and H. H. Dunkle</i>	398
Carbon Steel in the Temperature Range 1650 to 2100 Degrees Fahr.; Oxidation of a Low— <i>C. A. Siebert and Clair Upthegrove</i>	187
Carbon Steel; Prolonged Tempering at 100 Degrees Cent. and Aging at Room Temperature of 0.8 Per Cent— <i>G. A. Ellinger and R. L. Sanford</i>	495
Carbon Steels; Effect of Grain-Size Upon Some Physical Properties of Medium— <i>F. G. Sefing and K. J. Trigger</i>	782
Carbon Tool Steel; Interpretation of Torsion Impact Properties of— <i>G. V. Luerssen and O. V. Greene</i>	861

Carbon Tool Steels; Characteristics of One Per Cent— <i>T. G. Digges and Louis Jordan</i>	839
Carburizing; Heat Treatment in Controlled Atmospheres Including Gaseous— <i>C. R. Austin</i>	157
Case Hardened Steels; Physical Properties of— <i>O. W. McMullan</i>	319
Cast Alloy Steels; Properties of Some— <i>T. N. Armstrong</i>	286
Castings; Malleable— <i>Albert Sauveur and H. L. Anthony</i>	409
Cast Irons; Thermal Expansion Characteristics of Some Nickel— <i>T. J. Wood</i>	455
Cementite in Hypereutectoid Steels; Influence of Nonmetallic Inclusions Upon the Precipitation of Primary— <i>E. G. Mahin and E. F. Lee</i>	382
Cementite; Metastability of— <i>H. A. Schwartz</i>	126
Characteristics of One Per Cent Carbon Tool Steels; Hardening— <i>T. G. Digges and Louis Jordan</i>	839
Characteristics of Some Nickel Cast Irons; Thermal Expansion— <i>T. J. Wood</i>	455
Charts for Steel; X-Ray Exposure— <i>Herbert R. Isenburger</i>	614
Chemical Composition to the Rail Fissure Problem; Relation of— <i>Earnshaw Cook</i>	545
Chromium; Alloys of Iron and— <i>V. N. Krivobok</i>	1
Chromium-Nickel Austenitic Steels at Elevated Temperatures; Ductility of— <i>H. D. Newell</i>	225
Chromium Steel with the Notched Bar Impact Test; Correlation of Failures from Embrittlement of 4 to 6 Per Cent— <i>H. M. Wilten</i>	915
Chromium Steels of High Nitrogen Content— <i>Russell Franks</i>	968
Chromium Tool Steels; Practical Observations of Some High Carbon High— <i>W. H. Wills</i>	469
Cobalt High Speed Steel; Retained Austenite and Its Decomposition Range in a Quenched— <i>C. A. Liedholm</i>	672
Cobalt-Molybdenum System— <i>W. P. Sykes and H. F. Graff</i>	249
Commercial Steels; Importance of Aluminum Additions in Modern— <i>H. W. McQuaid</i>	797
Comparison of the Corrosion Resistance of Several Wrought Irons Made by Different Processes— <i>O. A. Knight and J. R. Benner</i>	693
Contributory Effects of Furnace Atmospheres on the Grain-Size of Molybdenum High Speed Steel— <i>Arthur Phillips and M. J. Weldon</i>	886
Controlled Atmospheres Including Gaseous Carburizing; Heat Treatment in— <i>C. R. Austin</i>	157
Correlation of Failures from Embrittlement of 4 to 6 Per Cent Chromium Steel with the Notched Bar Impact Test— <i>H. M. Wilten</i>	915
Corrosion Resistance of Several Wrought Irons Made by Different Processes; Comparison of the— <i>O. A. Knight and J. R. Benner</i>	693
Crystal; New Development in Electrical Strip Steels Characterized by Fine Grain Structure Approaching the Properties of a Single— <i>N. P. Goss</i>	511
Crystals in Silicon Iron; Orientation of— <i>Richard M. Bosorth</i>	1107
Cutting Temperatures Developed by Single-Point Turning Tools— <i>O. W. Boston and W. W. Gilbert</i>	703

D

Decomposition Range in a Quenched Cobalt High Speed Steel; Retained Austenite and Its— <i>C. A. Liedholm</i>	672
Deoxidation on Some Properties of Steel; Effect of— <i>C. H. Herty, Jr.</i>	113
Development in Electrical Strip Steels Characterized by Fine Grain Structure Approaching the Properties of a Single Crystal; New— <i>N. P. Goss</i>	511
Directional Properties in Rolled and Annealed Low Carbon Steel— <i>Arthur Phillips and H. H. Dunkle</i>	398
Distortion in Metals During Heat Treatment; Grain— <i>C. Nusbaum and N. P. Goss</i>	621
Ductility of Chromium-Nickel Austenitic Steels at Elevated Temperatures— <i>H. D. Newell</i>	225

E

Effect of Deoxidation on Some Properties of Steel— <i>C. H. Herty, Jr.</i> ...	113
Effect of Grain-Size Upon Some Physical Properties of Medium Carbon Steels— <i>F. G. Sefing and K. J. Trigger</i>	782
Effect of High Hydrostatic Pressures on Aging— <i>Leland Russell van Wert</i>	633
Effects of Furnace Atmospheres on the Grain-Size of Molybdenum High Speed Steel; Contributory— <i>Arthur Phillips and M. J. Weldon</i>	886
Electrical Strip Steels Characterized by Fine Grain Structure Approaching the Properties of a Single Crystal; New Development in— <i>N. P. Goss</i>	511
Elevated Temperatures; Ductility of Chromium-Nickel Austenitic Steels at— <i>H. D. Newell</i>	225
Embrittlement of 4 to 6 Per Cent Chromium Steel with the Notched Bar Impact Test; Correlation of Failures from— <i>H. M. Wilten</i>	915
Expansion Characteristics of Some Nickel Cast Irons; Thermal— <i>T. J. Wood</i>	455
Exposure Charts for Steel; X-Ray— <i>Herbert R. Isenburger</i>	614

F

Failures from Embrittlement of 4 to 6 Per Cent Chromium Steel with the Notched Bar Impact Test; Correlation of— <i>H. M. Wilten</i>	915
Fine Grain Structure Approaching the Properties of a Single Crystal; New Development in Electrical Strip Steels Characterized by— <i>N. P. Goss</i>	511
Furnace Atmospheres on the Grain-Size of Molybdenum High Speed Steel; Contributory Effects of— <i>Arthur Phillips and M. J. Weldon</i> ..	886
Furnace Walls; Graphical Method of Calculating Heat Loss Through— <i>Clarence E. Weinland</i>	431

G

Gaseous Carburizing; Heat Treatment in Controlled Atmospheres Including— <i>C. R. Austin</i>	157
Grain Distortion in Metals During Heat Treatment— <i>C. Nusbaum and N. P. Goss</i>	621
Grain-Size; Magnetic Properties of Iron as Affected by Carbon, Oxygen and— <i>T. D. Yensen and N. A. Ziegler</i>	556
Grain-Size of Molybdenum High Speed Steel; Contributory Effects of Furnace Atmospheres on the— <i>Arthur Phillips and M. J. Weldon</i>	886
Grain-Size Upon Some Physical Properties of Medium Carbon Steels; Effect of— <i>F. G. Sefing and K. J. Trigger</i>	782
Grain Structure Approaching the Properties of a Single Crystal; New Development in Electrical Strip Steels Characterized by Fine— <i>N. P. Goss</i>	511
Graphical Method of Calculating Heat Loss Through Furnace Walls— <i>Clarence E. Weinland</i>	431

H

Hardened Steels; Physical Properties of Case— <i>O. W. McMullan</i>	319
Hardening Characteristics of One Per Cent Carbon Tool Steels— <i>T. G. Digges and Louis Jordan</i>	839
Heat Loss Through Furnace Walls; Graphical Method of Calculating— <i>Clarence E. Weinland</i>	431
Heat Resistant Alloy; New— <i>S. L. Hoyt and M. A. Scheil</i>	1022
Heat Treatment; Grain Distortion in Metals During— <i>C. Nusbaum and N. P. Goss</i>	621
Heat Treatment in Controlled Atmospheres Including Gaseous Carburizing— <i>C. R. Austin</i>	157
High Carbon High Chromium Tool Steels; Practical Observations of Some— <i>W. H. Wills</i>	469

High Chromium Tool Steels; Practical Observations of Some High Carbon— <i>W. H. Wills</i>	469
High Hydrostatic Pressures on Aging; Effect of— <i>Leland Russell van Wert</i>	633
High Nitrogen Content; Chromium Steels of— <i>Russell Franks</i>	968
High Speed Steel; Contributory Effects of Furnace Atmospheres on the Grain-Size of Molybdenum— <i>Arthur Phillips and M. J. Weldon</i>	886
High Speed Steel; Retained Austenite and Its Decomposition Range in a Quenched Cobalt— <i>C. A. Liedholm</i>	672
High Temperature Properties of Steels; Influence of Carbon Content on— <i>A. E. White, C. L. Clark and R. L. Wilson</i>	995
Hydrostatic Pressures on Aging; Effect of High— <i>Leland Russell van Wert</i>	633
Hypereutectoid Steels; Influence of Nonmetallic Inclusions Upon the Precipitation of Primary Cementite in— <i>E. G. Mahin and E. F. Lee</i>	382

I

Impact Properties of Carbon Tool Steel; Interpretation of Torsion— <i>G. V. Luerssen and O. V. Greene</i>	861
Impact Resistance of Certain Nickel Steels at Low Atmospheric Temperatures— <i>D. A. Campbell</i>	761
Impact Test; Correlation of Failures from Embrittlement of 4 to 6 Per Cent Chromium Steel with the Notched Bar— <i>H. M. Wilten</i>	915
Importance of Aluminum Additions in Modern Commercial Steels— <i>Harry W. McQuaid</i>	797
Inclusions in Steel; Nonmetallic—Part I— <i>Stephen F. Urban and John Chipman</i>	93
Inclusions in Steel; Nonmetallic—Part II— <i>Stephen F. Urban and John Chipman</i>	645
Inclusions Upon the Precipitation of Primary Cementite in Hypereutectoid Steels; Influence of Nonmetallic— <i>E. G. Mahin and E. F. Lee</i>	382
Influence of Carbon Content on High Temperature Properties of Steels— <i>A. E. White, C. L. Clark and R. L. Wilson</i>	995
Influence of Nonmetallic Inclusions Upon the Precipitation of Primary Cementite in Hypereutectoid Steels— <i>E. G. Mahin and E. F. Lee</i>	382
Influence of Oxide Films on the Wear of Steels— <i>S. J. Rosenberg and Louis Jordan</i>	577
Interpretation of Torsion Impact Properties of Carbon Tool Steel— <i>G. V. Luerssen and O. V. Greene</i>	861
Iron and Chromium; Alloys of— <i>V. N. Krivobok</i>	1
Iron and Manganese; Alloys of—Part XIII— <i>F. M. Walters, Jr., and Cyril Wells</i>	727
Iron as Affected by Carbon, Oxygen and Grain-Size; Magnetic Properties of— <i>T. D. Yensen and N. A. Ziegler</i>	556
Iron, Manganese and Carbon; Alloys of—Part XIV— <i>Cyril Wells and F. M. Walters, Jr.</i>	751
Iron; Orientation of Crystals in Silicon— <i>Richard M. Bogorth</i>	1107
Irons Made by Different Processes; Comparison of the Corrosion Resistance of Several Wrought— <i>O. A. Knight and J. R. Benner</i>	693
Irons; Thermal Expansion Characteristics of Some Nickel Cast— <i>T. J. Wood</i>	455

L

Low Carbon Steel; Directional Properties in Rolled and Annealed— <i>Arthur Phillips and H. H. Dunkle</i>	398
Low Carbon Steel in the Temperature Range 1650 to 2100 Degrees Fahr.; Oxidation of a— <i>C. A. Siebert and Clair Upthegrove</i>	187

M

Magnetic Properties of Iron as Affected by Carbon, Oxygen and Grain-Size— <i>T. D. Yensen and N. A. Ziegler</i>	556
---	-----

Malleable Castings— <i>Albert Sauveur and H. L. Anthony</i>	409
Manganese; Alloys of Iron and—Part XIII— <i>F. M. Walters, Jr., and Cyril Wells</i>	727
Manganese and Carbon; Alloys of Iron—Part XIV— <i>Cyril Wells and F. M. Walters, Jr.</i>	751
Medium Carbon Steels; Effect of Grain-Size Upon Some Physical Properties of— <i>F. G. Sefing and K. J. Trigger</i>	782
Metallurgy of Arc Deposited Weld Metal; Studies on the— <i>S. L. Hoyt</i>	61
Metals During Heat Treatment; Grain Distortion in— <i>C. Nusbaum and N. P. Goss</i>	621
Metastability of Cementite— <i>H. A. Schwartz</i>	126
Molybdenum High Speed Steel; Contributory Effects of Furnace Atmospheres on the Grain-Size of— <i>Arthur Phillips and M. J. Weldon</i>	886
Molybdenum System; Cobalt— <i>W. P. Sykes and H. F. Graff</i>	249

N

New Development in Electrical Strip Steels Characterized by Fine Grain Structure Approaching the Properties of a Single Crystal— <i>N. P. Goss</i>	511
New Heat Resistant Alloy— <i>S. L. Hoyt and M. A. Scheil</i>	1022
Nickel Austenitic Steels at Elevated Temperatures; Ductility of Chromium— <i>H. D. Newell</i>	225
Notched Bar Impact Test; Correlation of Failures from Embrittlement of 4 to 6 Per Cent Chromium Steel with the— <i>H. M. Wilten</i>	915
Nickel Cast Irons; Thermal Expansion Characteristics of Some— <i>T. J. Hood</i>	455
Nickel Steels at Low Atmospheric Temperatures; Impact Resistance of Certain— <i>D. A. Campbell</i>	761
Nitrogen Content; Chromium Steels of High— <i>Russell Franks</i>	968
Nonmetallic Inclusions in Steel—Part I— <i>Stephen F. Urban and John Chipman</i>	93
Nonmetallic Inclusions in Steel—Part II— <i>Stephen F. Urban and John Chipman</i>	645
Nonmetallic Inclusions Upon the Precipitation of Primary Cementite in Hypereutectoid Steels; Influence of— <i>E. G. Mahin and E. F. Lee</i>	382

O

Orientation of Crystals in Silicon Iron— <i>Richard M. Bozorth</i>	1107
Oxidation of a Low Carbon Steel in the Temperature Range 1650 to 2100 Degrees Fahr.— <i>C. A. Siebert and Clair Upthegrove</i>	187
Oxide Films on the Wear of Steels; Influence of— <i>S. J. Rosenberg and Louis Jordan</i>	577
Oxygen and Grain-Size; Magnetic Properties of Iron as Affected by Carbon,— <i>T. D. Yensen and N. A. Ziegler</i>	556

P

Physical Properties of Case Hardened Steels— <i>O. W. McMullan</i>	319
Physical Properties of Medium Carbon Steels; Effect of Grain-Size Upon Some— <i>F. G. Sefing and K. J. Trigger</i>	782
Practical Observations of Some High Carbon High Chromium Tool Steels— <i>W. H. Wills</i>	469
Precipitation of Primary Cementite in Hypereutectoid Steels; Influence of Nonmetallic Inclusions Upon the— <i>E. G. Mahin and E. F. Lee</i>	382
Prolonged Tempering at 100 Degrees Cent. and Aging at Room Temperature of 0.8 Per Cent Carbon Steel— <i>G. A. Ellinger and R. L. Sanford</i>	495
Properties in Rolled and Annealed Low Carbon Steel; Directional— <i>Arthur Phillips and H. H. Dunkle</i>	398
Properties of Carbon Tool Steel; Interpretation of Torsion Impact— <i>G. V. Luerssen and O. V. Greene</i>	861
Properties of Case Hardened Steels; Physical— <i>O. W. McMullan</i>	319
Properties of Iron as Affected by Carbon, Oxygen and Grain-Size; Magnetic— <i>T. D. Yensen and N. A. Ziegler</i>	556

Properties of Single Crystal; New Development in Electrical Strip Steels Characterized by Fine Grain Structure Approaching the— <i>N. P. Goss</i>	511
Properties of Some Cast Alloy Steels— <i>T. N. Armstrong</i>	286
Properties of Steel; Effect of Deoxidation on Some— <i>C. H. Herty, Jr.</i> ...	113
Properties of Steels; Influence of Carbon Content on High Temperature — <i>A. E. White, C. L. Clark and R. L. Wilson</i>	995

Q

Quenched Cobalt High Speed Steel; Retained Austenite and Its Decomposition Range in a— <i>C. A. Liedholm</i>	672
--	-----

R

Rail Fissure Problem; Relation of Chemical Composition to the— <i>Earnshaw Cook</i>	545
Rail Steels; Fissures in— <i>Earnshaw Cook</i>	545
Relation of Chemical Composition to the Rail Fissure Problem— <i>Earnshaw Cook</i>	545
Resistance of Certain Nickel Steels at Low Atmospheric Temperatures; Impact— <i>D. A. Campbell</i>	761
Resistance of Several Wrought Irons Made by Different Processes; Comparison of the Corrosion— <i>O. A. Knight and J. R. Benner</i>	693
Retained Austenite and Its Decomposition Range in a Quenched Cobalt High Speed Steel— <i>C. A. Liedholm</i>	672
Rolled and Annealed Low Carbon Steel; Directional Properties in— <i>Arthur Phillips and H. H. Dunkle</i>	398

S

Silicon Iron; Orientation of Crystals in— <i>Richard M. Bozorth</i>	1107
Single-Point Turning Tools; Cutting Temperatures Developed by— <i>O. W. Boston and W. W. Gilbert</i>	703
Steel; Aging of— <i>E. S. Davenport and E. C. Bain</i>	1047
Steel; Contributory Effects of Furnace Atmospheres on the Grain-Size of Molybdenum High Speed— <i>Arthur Phillips and M. J. Weldon</i>	886
Steel; Directional Properties in Rolled and Annealed Low Carbon— <i>Arthur Phillips and H. H. Dunkle</i>	398
Steel; Effect of Deoxidation on Some Properties of— <i>C. H. Herty, Jr.</i>	113
Steel; Interpretation of Tension Impact Properties of Carbon Tool— <i>G. V. Luerssen and O. V. Greene</i>	861
Steel in the Temperature Range 1650 to 2100 Degrees Fahr.; Oxidation of a Low Carbon— <i>C. A. Siebert and Clair Upthegrove</i>	187
Steel; Nonmetallic Inclusions in—Part I— <i>Stephen F. Urban and John Chipman</i>	93
Steel; Nonmetallic Inclusions in—Part II— <i>Stephen F. Urban and John Chipman</i>	645
Steel; Prolonged Tempering at 100 Degrees Cent. and Aging at Room Temperature of 0.8 Per Cent Carbon— <i>G. A. Ellinger and R. L. Sanford</i>	495
Steel; Retained Austenite and Its Decomposition Range in a Quenched Cobalt High Speed— <i>C. A. Liedholm</i>	672
Steel with the Notched Bar Impact Test; Correlation of Failures from Embrittlement of 4 to 6 Per Cent Chromium— <i>H. M. Wilten</i>	915
Steel; X-Ray Exposure Charts for— <i>Herbert R. Isenburger</i>	614
Steels at Elevated Temperatures; Ductility of Chromium-Nickel Austenitic— <i>H. D. Newell</i>	225
Steels at Low Atmospheric Temperatures; Impact Resistance of Certain Nickel— <i>D. A. Campbell</i>	761
Steels Characterized by Fine Grain Structure Approaching the Properties of a Single Crystal; New Development in Electrical Strip— <i>N. P. Goss</i>	511
Steels; Effect of Grain-Size Upon Some Physical Properties of Medium Carbon— <i>F. G. Sefing and K. J. Trigger</i>	782

Steels; Fissures in Rail— <i>Earnshaw Cook</i>	545
Steels; Hardening Characteristics of One Per Cent Carbon Tool— <i>T. G. Digges and Louis Jordan</i>	839
Steels of High Nitrogen Content; Chromium— <i>Russell Franks</i>	968
Steels; Importance of Aluminum Additions in Modern Commercial— <i>H. W. McQuaid</i>	797
Steels; Influence of Carbon Content on High Temperature Properties of— <i>A. E. White, C. L. Clark and R. L. Wilson</i>	995
Steels; Influence of Nonmetallic Inclusions Upon the Precipitation of Primary Cementite in Hypereutectoid— <i>E. G. Mahin and E. F. Lee</i>	382
Steels; Influence of Oxide Films on the Wear of— <i>S. J. Rosenberg and Louis Jordan</i>	577
Steels; Physical Properties of Case Hardened— <i>O. W. McMullan</i>	319
Steels; Practical Observations of Some High Carbon High Chromium Tool— <i>W. H. Wills</i>	469
Steels; Properties of Some Cast Alloy— <i>T. N. Armstrong</i>	286
Strip Steels Characterized by Fine Grain Structure Approaching the Properties of a Single Crystal; New Development in Electrical— <i>N. P. Goss</i>	511
Structure Approaching the Properties of a Single Crystal; New Development in Electrical Strip Steels Characterized by Fine Grain— <i>N. P. Goss</i>	511
Studies on the Metallurgy of Arc Deposited Weld Metal— <i>S. L. Hoyt</i> ..	61

T

Temperature Range 1650 to 2100 Degrees Fahr.; Oxidation of a Low Carbon Steel in the— <i>C. A. Siebert and Clair Upthegrove</i>	187
Temperatures Developed by Single-Point Turning Tools; Cutting— <i>O. W. Boston and W. W. Gilbert</i>	703
Tempering at 100 Degrees Cent. and Aging at Room Temperature of 0.8 Per Cent Carbon Steel; Prolonged— <i>G. A. Ellinger and R. L. Sanford</i>	495
Thermal Expansion Characteristics of Some Nickel Cast Irons— <i>T. J. Wood</i>	455
Tool Steel; Interpretation of Torsion Impact Properties of Carbon— <i>G. V. Luerssen and O. V. Greene</i>	861
Tool Steels; Hardening Characteristics of One Per Cent Carbon— <i>T. G. Digges and Louis Jordan</i>	839
Tool Steels; Practical Observations of Some High Carbon High Chromium— <i>W. H. Wills</i>	469
Tools; Cutting Temperatures Developed by Single-Point Turning— <i>O. W. Boston and W. W. Gilbert</i>	703
Torsion Impact Properties of Carbon Tool Steel; Interpretation of— <i>G. V. Luerssen and O. V. Greene</i>	861
Turning Tools; Cutting Temperatures Developed by Single-Point— <i>O. W. Boston and W. W. Gilbert</i>	703

W

Wear of Steels; Influence of Oxide Films on the— <i>S. J. Rosenberg and Louis Jordan</i>	577
Weld Metal; Studies on the Metallurgy of Arc Deposited— <i>S. L. Hoyt</i> ..	61
Wrought Irons Made by Different Processes; Comparison of the Corrosion Resistance of Several— <i>O. A. Knight and J. R. Benner</i>	693

X

X-Ray Exposure Charts for Steel— <i>Herbert R. Isenburger</i>	614
---	-----
